Mines and Mining Stocks

RESUMPTION AT

of the Amalgamated Copper Company.

CIENCY DEMANDED.

(Pollock Private Wire.) coal mines controlled by the Amalgamated company and shipments of custom ores and lining ores will be re-ceived as usual at the smelter," said John D. Ryan, head of the Amalgamated interests in Montana, on his ar-

rival at Butte Saturday noon. sales for European shipment have been very large within the last few week and there is no accumulation of coppounsold that is worth considering. The American consumption is still light compared with the last few years, ar the large sales made for the past si months have been mostly for expor but we are in hopes that by the tin the increased product resulting fro a resumption of operations will have reached the market, which will be three or four months, the America demand will have increased sufficiently to take up the increased produc-

Believes Copper Will Advance.

in such a state that had the Butte decents per fine ounce mines gone on producing to their full capacity, the result might have been such demoralization of the metal market that it would not have righted it self for a very long time. But on account of the curtailment of production, and the very good business abroad, tion, and the very good business abroad, the metal market is now in a healthy state, although the price at which copper is selling is considerably below. New York, March 2.—At the metal with the metal exchange today all grades of copper made favorable reports on the Federal

While the eastern mining stocks and industrials were all in good form yesterday, wire troubles later in the day prevented Pollock & Co., from receiving the usual figures on the range of prices.

Stocks in San Francisco.

The closing quotations on Nevada stocks in San Francisco yesterday, as reported over the private wires of James A. Pollock & Co., were as follows: Pollock & Co., from receiving the usual figures on the range of prices, sales made, etc., and the only list recured for printing was the following closing quotations on the Boston market:

Why Stevens-Duryea Sixes Are Silent

The Stevens-Duryea uses no chains at all. The turning of the bevel gear in its dust-proof case is inaudible. The balanced engine of the Six reduces to a minimum the vibration that loosens fenders, dashes, steering columns, etc. The Stevens-Duryea Six has direct drive on high gear, thus doing away entirely with the noises of intermediate gear wheels. And the car may be KEPT on high gear practically all of the time. With six cylinders instead of four delivering the same power, it is obvious that the six-cylinder impulses are much lighter and of course closer together, so that the six-cylinder exhaust is guieter and smoother than that of the four of equal power. Thus the Stevens-Duryea Six makes less noise than the ordinary high-power cars.

Not Hurry to Resume at Bingham Junction.

An undercurrent of opinion to the efcompany will be in no hurry to resume operations at its lead smelting works tion of ores, and in all things that go at Bingham Junction, even if its peti-to affect the cost of product. tion to the federal court is granted, was found in brokerage and mining circles

placed wagers at four to one that resumption would not begin previous to Sept. I, if at all.

Officials of the company, from President W. G. Sharp down, have declined all the time to make any statement concerning what the company might do in the future, though the impression has been had from their utterances that, if permitted to do so on fair terms, they would reopen the smelter in the near future. As the hearing on the company's STOCKS ON EXCHANGE future. As the hearing on the company's application for a modification of the smoke injunction, so-called, does not a great deal doing in uncome up until the end of the presen a month yet, at least.

May Go to Ely to Operate.

Things have been happening, how ever, that at least suggest the possi oility that the company may never at tempt to smelt ores in this valley again and particularly if the court does no grant its modification petition. From what has leaked out, it would seen that the big corporation has had it engineers at work sizing up other loca tions for smelters and it can be stated positively that, during the past few weeks, or since it was announced that the Cumberland-Ely was after it, Unit BY THE GOVERNMENT ed States company engineers have been examining the Federal-Ely company's

company sees in this site an ideal place to engage in the smelting business for ever unmolested. It is also claimed that this is one of the reasons why the Federal-Ely declined to give an option on TRIMMED DOWN AGAIN the property without a binding pay ment, to the Cumberland-Ely company fact that this subject was up for dis-

It has been pointed out that the Ely site would be a desirable one for the United States company for several reasons. With the railroad built from Ely to Tonopah, as planned, it would bring the company's mines at Eureka within easy distance of smelting facilities and give the company a chance to compet for all classes of ore from camps trib-ntary to that line. Again, if a road is built south from Ely to Pioche, and the San Pedro builds west from Iron on through the Deep Creek country to ly, it would give the company great oportunity to ship ores from the Cen nnial-Eureka, at Tintic, and its mines Bingham, right through to its works Ely, and also give it an even break ith the Guggenhelm crowd for all cusm business that must come through camps that these lines will make oductive of heavy tonnages of all asses of ore.

It is therefore seen that the United ates company may be planning to 30; 400 at 78c entually quit the Utah field entirely nd make its stand in that portion of 43c. e country west of here where business sure to be heavy in the future and here it is impossible that damage can e done to farming and ranching inter-its. If the Deep Creek line is built it not going to be a very long haul from ntic and Bingham to Ely; if the road Pioche is built, it will be much easto ship ores from Pioche to Ely than om Pioche to Salt Lake, as the disnce, as the crow flies, is only about miles, or twenty miles less than the stance between here and Milford, eaver county. The Deep Creek couny is full of ore; so are the ranges at would flank the road between Pithe and Ely and it is not impossible believe that the United States comany will go after a full share of the siness that the country mentioned Il have to offer.

Ore and Bullion.

Ore and bullion settlements in this city resterday, as reported by McCornick & Co., amounted to \$45,000, as follows: Silver, lead, gold and copper ores, \$15,000; pase bullion, \$30,000.

WORK TO RESUME ON THE CROWN POINT

Uncle Jesse Knight was up from Provo again yesterday looking after business on this end of the line. He stated that the new shaft workings on the Colorado were showing up the ore in good shape, and he stated, also, that new work was being planned for that

With respect to the sharp advance in the price of Crown Point, Mr. Knight said he did not know what to attribute it to, unless it was the prospect of an early resumption of work in the joint shaft, recently suspended, which, he says, is likely to come. When sinking was suspended in this shaft the report that rock carrying fifteen ounces silver had been reached was in circulation, and the statement followed that Superintendent Roundy got huffy over the leaking out of the information and promptly fired every man and stopped

cars were reported from the Pioneer sam-oler, at Sandy.

Correspondence Solicited.

Fred R. Davis, the well-known broker, s back from a month's vacation trip to he coast.

the coast.

Burned to the bone with the Rawhide fever, Anthony McCauley, whose brother operates the chief telephone line into the new gold camp, pulled out for the diggings last night. His brother writes most enthusiastically of the future of the district and declares there is a chance to make money in any line of būsiness.

T. R. Jones, the veteran smelterman, who has been confined to his home for a month with la grippe, tonsilitis and a threatened attack of pneumonia, was ablesto be down town again yesterday. He was feeling first rate, as he did not attempt to get out until he considered it perfectly safe.

The Bullfrog National Bank Mining

safe.

The Bullfrog National Bank Mining company is to hold a special meeting at Goldfield on the 16th for the purpose of devising some plan of meeting the indebtedness of the company, providing means for further development and for the election of a new board of directors. Quite a little of the stock, it is claimed, is held in this city.
